

Dropbox Sign x SAP SuccessFactors

Manual signatures, paper contracts, media discontinuity: in many application processes, digitization ends too soon. With the integration of Dropbox Sign in SAP SuccessFactors, you can close the gap directly in your workflow—quickly, easily, and in compliance with legal requirements.

Process stalled = Contract lost

In many companies, the digital HR experience ends where it matters most—at the contract signing stage. The obstacles: manual approvals, paper-based signatures, or tool changes. The result? Delayed hires, frustration for HR, and lost trust on the part of candidates.

Typical challenges:

- ✗ Contracts are signed too late
- ✗ Media breaks disturb applicants
- ✗ HR has to manually update documents
- ✗ Missing signatures delay processes
- ✗ Legal certainty is often not guaranteed

Quick contracts

E-signatures directly from SAP SuccessFactors: No tool changes, no more waiting.

Digital processes

No paper, no export. Dropbox Sign is deeply integrated and mobile-friendly.

GDPR compliant

Signatures with audit trail, securely encrypted, and traceable at all times.

This is how you close the gap in the recruiting process

Dropbox Sign is designed to make digital signing processes intuitive, secure, and seamless within existing HR systems—with no extra work for your admins. With direct integration with SAP SuccessFactors, HR teams can create, send, and track signature requests right where they work, using their familiar processes.

Dropbox Sign at a glance:
